

# Paolo Augello

## Junior Software Developer

Passionate Computer Science graduate bridging academic programming rigor (C/C++, Java) with self-taught expertise in modern mobile and web ecosystems (Flutter, Swift). Proven track record shipping production-ready apps to the App Store.

**Available for work starting July 2026.**

## Experiences

### Mobile App Developer & Founder | Kaizen

June 2026 - Present

A native-feeling iOS digital well-being application built with Flutter and Firebase designed to help users reduce screen time.

#### Key contributions:

- Designed, architected, and successfully deployed a fully functional iOS application focused on digital well-being and screen time management to the Apple App Store.
- Engineered the frontend using Flutter & Dart, integrating native iOS system components such as DeviceActivityMonitor for precise screen-time tracking.
- Built and secured a serverless backend infrastructure using Firebase Cloud Functions and Firestore, implementing strict security and data validation rules.
- Managed the full product lifecycle: orchestrated beta testing phases, navigated Apple's App Store Review process, and built a custom referral & promo code engine to drive user acquisition.

### Student Worker | Delhaize

Summer 2022

Summer retail position focused on inventory management, teamwork, and delivering high-quality customer service under fast-paced, high-pressure operational conditions.

#### Key contributions:

- Maintained efficient inventory management and high-standard customer service in a fast-paced retail environment.
- Developed strong teamwork, time management, and problem-solving skills under operational pressure.

## Education

**ULB, Brussels** | Bachelor in Computer Science

September 2023 - January 2026

## Core expertise

**Mobile Development:** Flutter, Dart, Swift, React Native, iOS Environment.

**Web Frontend:** React, Next.js, Astro, TypeScript, TailwindCSS, HTML/CSS.

**Backend & Cloud:** Firebase (Cloud Functions, Firestore, Auth), Node.js, REST APIs.

**Languages & Foundations:** Java, Python, C++, C, SQL, OOP, Data Structures.

**AI & LLM Integration:** OpenAI API, Anthropic Claude, Google Gemini.

**Design & UI/UX:** Figma, Rive, Component Libraries.

**Tools & Devops:** Git, GitHub, VS Code, Xcode

## Additional

**Product Mindset & Analytics:** Focused on user impact by aligning features with needs and iterating from feedback.

**Autonomy & Continuous Learning:** Self-driven engineer capable of independently mastering, designing and shipping software with modern development stacks.

**Languages:** French (Native), English (Professional), Dutch (Intermediate).
